TWIST

THERMAL WALL INJECTION SYSTEMS & TREATMENTS

SAFE - SIMPLE - PRECISE

TWIST (Thermal Wall Injection Systems and Treatments) is a next generation delivery system designed to treat a variety of common pest and moisture problems. For residential and commercial use, the patented delivery system consists of 2 styles of injector plugs that distribute a precise, targeted application of your desired treatment into any enclosed area, such as walls and inaccessible voids. Just install the plugs and inject the appropriate treatment where needed in any new or existing building. Whether treating pest or moisture problems, TWIST ensures maximum, long lasting results.

- Minimizes pesticide exposure and reduces airborne toxins, making it healthier for children and pets.
- Promotive solution to good health.
- Two 100% zinc plugs, the IP Exterior and the IP Interior, provide 4-port radial distribution for maximum coverage.
- Quick installation in any surface thickness from 1/16 to 2 inches including cabinet and vanity bases, masonry block, walls, floors and ceilings.
- When paired with the appropriate treatment, controls common pest problems such as ants, termites, roaches and rodents, as well as moisture problems such as mold, mildew and wood rot.
- Accommodates a variety of pest treatment forms such as powder, liquids, fine granules, aerosols and foam.
- Adaptable for use with fumigants to treat mold, dry wood termites and more.

*TWIST creates a pest and moisture blocking barrier, delivering worry-free protection
24 hours a day, 7 days a week.*

Pest Control and Wood Preservation Delivery System

TWIST

Pest Control and Pre-Treatment

Use this proactive system to treat or pre-treat any building by installing in select locations such as:

- Above hose spigots, A/C and oil fill pipe entrances.
- North facing elevations or areas of little or no sunlight.
- Kitchen and vanity cabinet bases.
- Decorative columns.
- Crawl spaces.
- Masonry block walls.
- Cupboards and food storage areas.

Pest Free Zone

The Next Generation Wall & Void Treatment System Promotes E.P.A. 6-Point Criteria for Reduced Risk:

- 1) Low impact on human health.
- 2) Low toxicity to non-target organisms (Birds-Fish-Plants).
- 3) Low potential for ground water contamination.
- 4) Low use rate.
- 5) Low pesticide resistance potential.
- 6) Compatibility with integrated pest management programs.

Performance Advantages

Complies with Integrated Pest Management Programs:

- Minimizes exposure to harmful toxins.
- Cleaner, safer application in any building:
 - Homes
 - Schools
 - Dormitories
 - Restaurants
 - Hospitals
 - Hotels
 - Food Processing Facilities
- 2 simple designs to handle any job.
- Made of high quality, durable zinc for years of service.
- Made in USA, each plug comes with a 1 year warranty.
- No expensive equipment needed-install with a 1 inch hole - saw and 1/2" square drive ratchet.
- Weather tight, paint-able cape for a clean, finished look.
Easy

About Inject Solutions

Founded in 2005 and based in Gloucester, MA, Inject Solutions is the creator of a next generation pest control delivery system, which allows a better solution for treatment at the point of entry. Their Injector Plugs are proudly made in the USA and are protected under patents numbers 6,966,143 and 6,840,004.
